

**CLEANING GUIDE**  
**MILANO AND ION VINYL**  
**with NANOCIDE™**

In general, most household soil can be easily removed with warm soapy water and several clear water rinses. Moderate scrubbing with a medium bristle brush will help to loosen the soiling agent from the impressions of the surface. For more specific staining, refer to the following guide.

STAIN	CLEANING INSTRUCTION
Soil, Eye shadow, Crayon, Chocolate, Suntan Lotion	Warm soapy water and rinse. Use General Purpose Vinyl Cleaner or mild household cleanser such as 409®. Rinse with clear water and dry.
Ball Point Ink	Immediately wipe with 70% rubbing alcohol. Rinse and dry with clean cloth. Rinse with clear water and dry.
Tar/Asphalt, shoe polish, grease	Remove immediately. Dampen cloth with mineral spirits, rub gently from outside edge of stain to center. Rinse with mild soap and water. Rinse with clear water and dry.
Surface Mildew	Use General Purpose Vinyl Cleaner or mild household cleanser such as 409®. Rinse with clear water and dry. If mildew stain persists clean with 5:1 bleach and water. Rinse with clear water and dry.

NOTE: Powdered abrasives, steel wool and industrial strength cleaners are not recommended.

\*Results may vary under actual conditions.
